

KRITTISH BARMAN

Full Stack Developer · Cybersecurity Enthusiast · AI Workflow Builder

Krishnanagar, WB, India | bkrittish@gmail.com | +91-9749513494 | www.linkedin.com/in/krittish-barman | https://github.com/Krittish-Barman

PROFESSIONAL SUMMARY

MCA candidate (MAKAUT, 2025–2027) with hands-on expertise in full-stack React development, cybersecurity penetration testing, and AI-powered workflow automation. Skilled in building production-grade SPAs, integrating REST APIs, and automating network security tasks using Python. Currently expanding expertise in LLM integration and prompt engineering to deliver smarter, faster software solutions. Strong communicator bridging technical development with business requirements.

EDUCATION

MCA – Master of Computer Applications

MAKAUT · B.P. Poddar Institute, WB

Dec 2025 – Jun 2027 · *Currently Pursuing*

BCA – Bachelor of Computer Applications

MAKAUT · Global College of Sci. & Tech., WB

Sep 2022 – Jun 2025 · CGPA: **7.43**

Higher Secondary (Class XII)

WBBSE · Kabi Bijoylal H.S. Institute, WB

2020 – 2022 · Marks: **75.2%**

Madhyamik (Class X)

WBBSE · Krishnagar High School, WB

2020 · Marks: **63%**

TECHNICAL SKILLS

Languages

Python · JavaScript (ES6+) · HTML5 · CSS3 · Java

Frameworks

Tailwind CSS

AI & LLM

Claude API · Prompt Engineering

DevOps

Git · GitHub · VS Code · Linux · Shell Scripting

Security

Wireshark · Metasploit · Aircrack-ng · Nmap · Kali

Cloud

IBM Cloud Fundamentals · Cloud Architecture

EXPERIENCE

Cybersecurity Intern – System Hacking | Webel Fujisoft Vara CoE, Kolkata

Jul 2024 – Aug 2024

- Performed vulnerability assessments on Wi-Fi networks using Aircrack-ng and Wireshark; identified critical security gaps and documented remediation recommendations.
- Developed Python automation scripts to monitor network traffic patterns in real time, enabling proactive anomaly detection and reducing manual analysis effort.
- Executed penetration testing in sandboxed Linux environments with Metasploit and Nmap; produced structured security reports for the engineering team.

PROJECTS

Watchverse – Movie Discovery Platform · React.js · TMDB API · Tailwind CSS · JavaScript

- Built a responsive SPA with React.js and TMDB API integration; used React Hooks for efficient state management and modular component architecture.
- Designed mobile-first UI with Tailwind CSS; optimized API calls and implemented robust error handling for seamless cross-device experience.

Weather Tracking System · JavaScript · REST APIs · HTML/CSS · Geolocation API

- Built real-time weather app integrating the Geolocation API and external weather REST APIs using async/await for non-blocking, error-resilient data fetching.
- Implemented dynamic DOM manipulation for instant content updates; delivered an intuitive location-based search UI with fully responsive design.

CERTIFICATIONS & TRAINING

Python Programming Workshop — IIT Kharagpur | Python Programming Certification — Cisco Networking Academy

Cloud Computing Fundamentals — IBM | Diploma in Information Technology — JNNYC

CORE COMPETENCIES

Data Structures & Algorithms · API Integration · Responsive Web Design · AI Workflow Automation · Penetration Testing · Client Communication · Requirement Analysis · Team Collaboration · Problem Solving · Adaptability

HOBBIES & INTERESTS

Ethical Hacking & CTF Challenges · Open Source Contribution · Building AI-Powered Projects · Tech Blogging · Gaming · Exploring New Programming Languages · Cybersecurity Research
